

Metallurgical Technician Job Opportunity

The prospective candidate shall:

- Perform metallurgical evaluations in support of failure analysis and field inspection projects.
- Obtain, measure, and prepare samples for metallographic examination and testing.
- Exhibit knowledge of, or have interest in, photographic documentation.
- Follow staff metallurgical engineers' test procedures.
- Agree to work occasionally on weekends, overtime, and travel as required.
- Work in less-than-optimum conditions during field-related projects.
- Demonstrate experience in metallurgical replication a plus.
- Work is primarily related to oil and gas industries.

Required skills/experience shall include:

- 3 to 5 years in a metallurgical testing laboratory.
- An Associate Degree in a technical field, such as machine shop operations and/or non-destructive testing a plus.
- Proficient computer skills in Microsoft Word and Excel.
- A high school diploma minimum.

Any candidates who seek a challenging work environment and variety in the work day should forward their resume and cover letter to jobs@stress.com or Stress Engineering Services, Inc., 13800 Westfair East Dr., Houston, TX 77041 (Attn: Leo Vega)
