

## Sales Engineer Job Opportunity

**Location:** Cincinnati, OH

**Experience:** 15+ years plant experience in the refining or chemical industries with a BS in Mechanical, Materials, or Chemical Engineering from an accredited College or University. Sales experience representing engineering services and/or engineered products to refineries and chemical plants. Experience with an engineering services firm is a plus.

**Minimum Skills Required:** In-plant experience and knowledge of key processes and plant equipment. Proven track record of sales experience dealing with refineries and chemical plants. SES is looking for people who are self starters and motivated to help clients solve their problems by building long term trust relationships.

**Key Responsibilities:** This person will be responsible for assisting in the development of Stress Engineering's National and International engineering practice in the refinery, chemical and power business segments, with a focus on the Midwest and East Coast plants.

**Stress Engineering Services, Inc., an employee-owned company with offices in Houston, Cincinnati, New Orleans, and Baton Rouge, operates one of the nation's largest plant-support engineering practices. Service offerings include fitness-for-service assessments, failure analysis, non-destructive testing services, metallurgical and failure analysis, vibration, flow and process simulation.**
