

 **MOHR ENGINEERING DIVISION**

a division of  **STRESS ENGINEERING SERVICES, INC.**

**THE INNOVATION LEADER
IN ENGINEERING, DESIGN & TESTING**

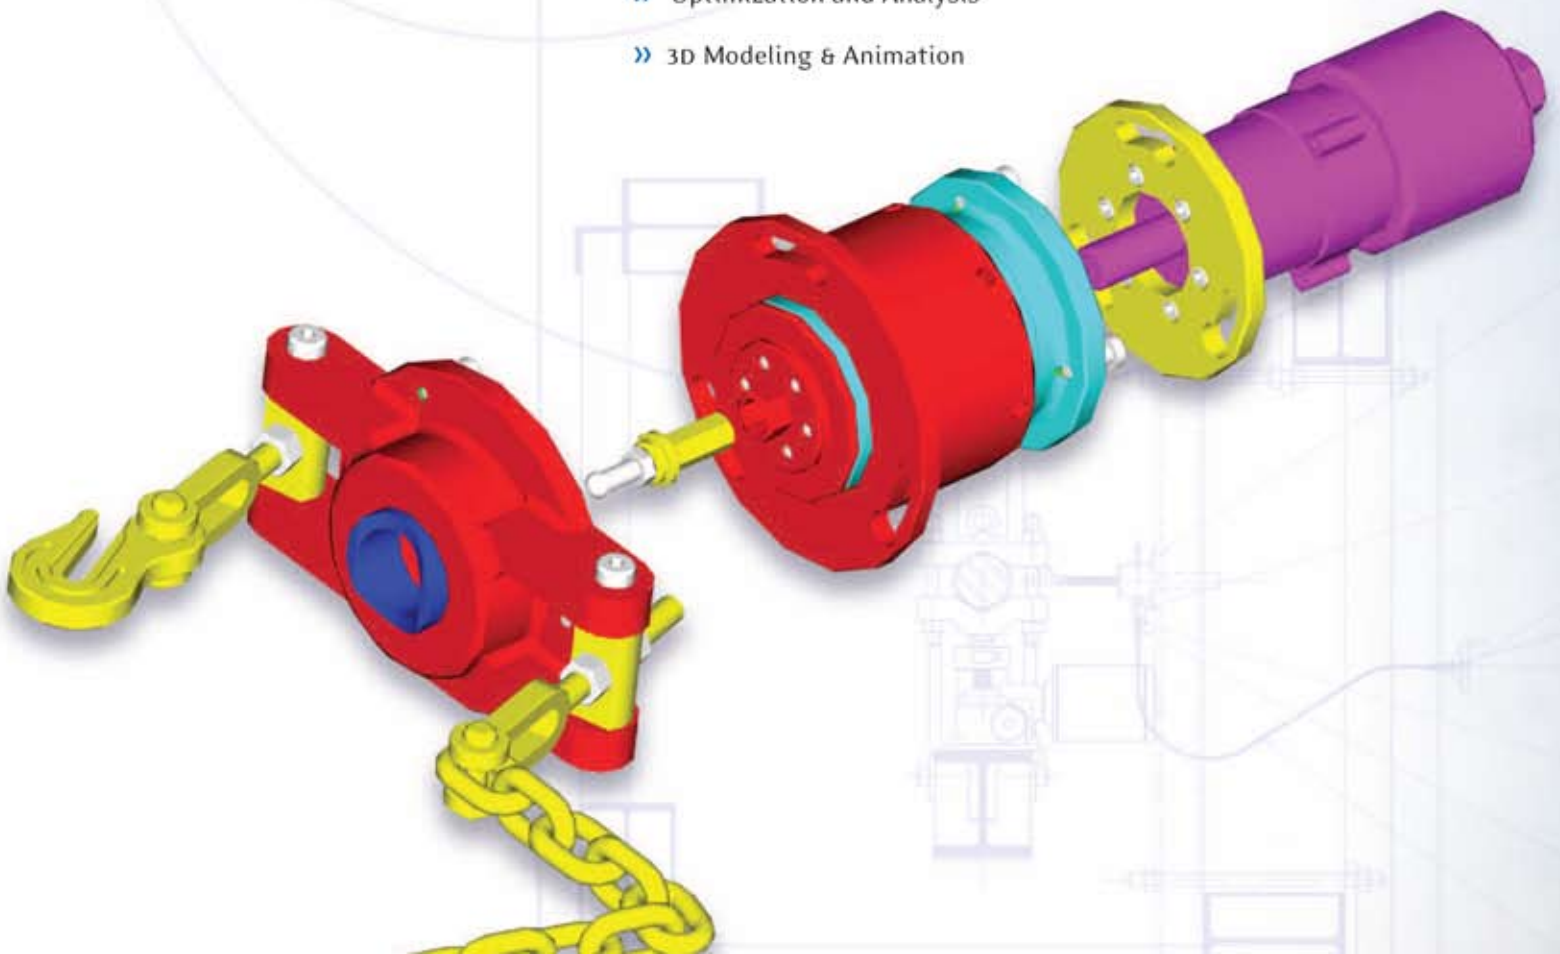

MOHR ENGINEERING *offers exceptional capabilities in the area of mechanical design and development.*

We combine detail and distinction with a broad base of industry knowledge to deliver superior design solutions.

At every step in the design process, from concept development to product completion and beyond, Mohr's diverse engineering staff adds measurable value. Our design team is comprised of highly-skilled mechanical engineers with real-world experience. We combine this experience with extensive testing, materials, electrical and analysis capabilities to provide a truly comprehensive selection of design services.

- » New Product Design & Development
- » Design Verification
- » Test Systems Design
- » Optimization and Analysis
- » 3D Modeling & Animation

TESTING SERVICES

IN THE FIELD or in our advanced full-scale test facility, Mohr Engineering is unsurpassed in both technical knowledge and testing capabilities.

For over 30 years we have been providing an array of testing services ranging from instrumented proof tests to full-scale prototype tests. In addition, we have proven expertise in developing special purpose tests, as well as custom engineered test configurations to simulate specific field conditions.

Our vast testing facility features a diverse selection of testing equipment and capabilities including various static tensile load frames and an assortment of pressure test chambers and vessels that are capable of simulating many commonly encountered drilling and deepwater environmental parameters.

PERFORMANCE TESTING

- » Pressure/Collapse
- » Mechanical Load
- » Cyclic/Fatigue
- » High Pressure/Temperature
- » Coiled/Flexible Tubing
- » Tubulars/Casing Wear

PRODUCTION TESTING

- » Proof Load
- » Design Verification
- » Calibration/Certification

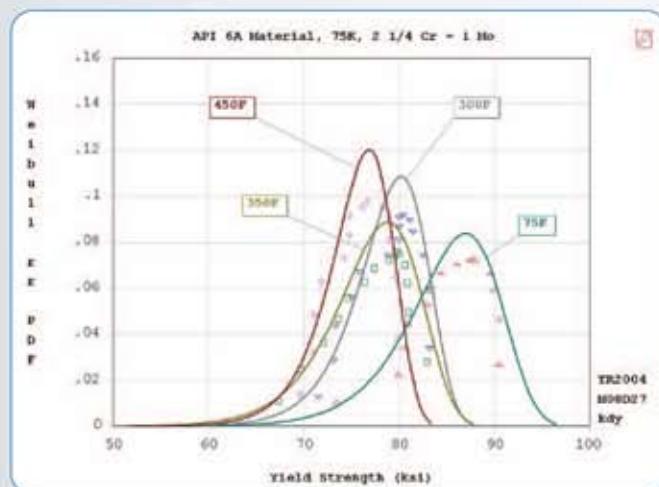

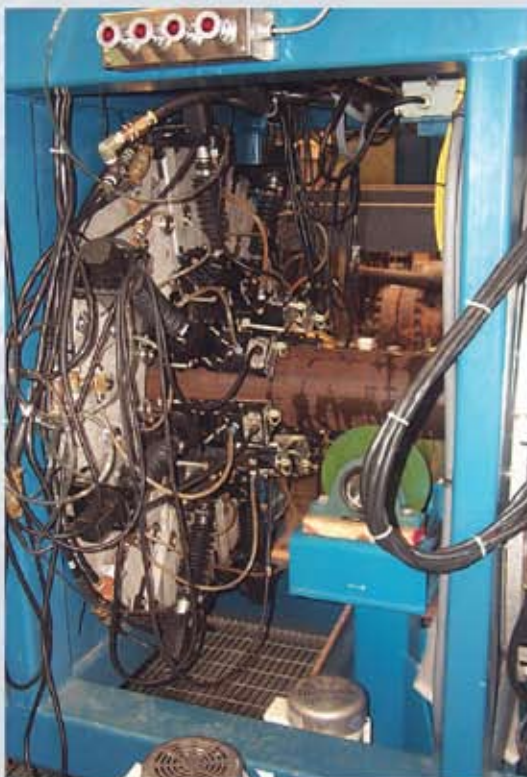

ENGINEERING SUPPORT SERVICES

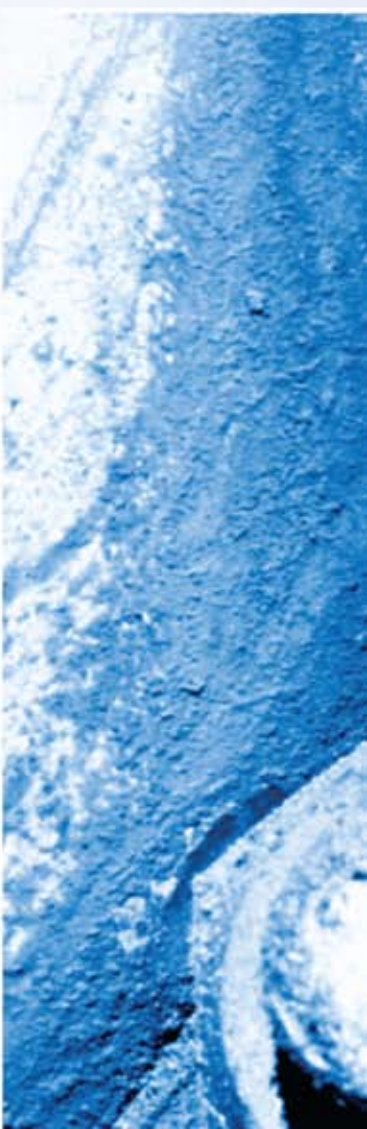

PRACTICAL, RELIABLE SOLUTIONS *to engineering challenges result from bringing skill, experience and imagination simultaneously into focus.*

This integrated, multi-disciplinary approach has been the foundation of Mohr Engineering's outstanding reputation for quality and innovation. Our collective credentials provide a broad range of conceptual and viable experience that produces a host of engineered solutions including:

- » Product Design & Development
- » Risk & Reliability Analysis
- » Mechanical Engineering
- » Forensic Engineering
- » Systems Integration
